

Home & Garden Agriculture

A journey of innovation and growth

Epoca, founded in 1968, is a leader in the fields of professional and domestic cleaning, the chemical and food industry, gardening and agriculture. From a small family business, the company has achieved exponential growth, increasing its turnover from 3.8 to 13 million and its workforce from 25 to 55 specialists. Operating three production plants in Bassano del Grappa, covering 11,000 square metres, Epoca ensures the high quality of its products through in-house and advanced production processes characterised by innovation and originality.

Epoca's corporate philosophy is based on four pillars: product quality, attention to market evolution, valorisation of human resources and focus on customer satisfaction. Demonstrating a concrete commitment to the environment, Epoca has flanked the Eco-Love range with two other lines of eco-sustainable products that meet the criteria of efficiency and eco-compatibility. With a presence in more than 80 countries, Epoca has become a recognised symbol of "Italian style" in the industrial and home-garden fields.

Epoca's experience reflects a determination to 'go beyond boundaries', a vision designed and driven by the Boriani family, which continues to stimulate growth and innovation in the contemporary industrial landscape.

Love Life, for those who want to make a difference to the planet without losing out on style and quality

The new product lines, SeaLove and BeeLove, join the established range of eco-friendly products represented by the EcoLove line. This important expansion is the result of constant research and development undertaken by the company, coupled with an ambitious industrial plan aimed at promoting sustainability.

The new range bears witness to Epoca's commitment to providing environmentally friendly solutions, responding to the needs of a clientele attentive to eco-sustainability and desirous of high quality products with reduced environmental impact.

Sealove Line

SeaLove is a revolutionary product line with the primary goal of protecting the oceans and keeping them clean. What makes SeaLove unique is the exclusive use of materials from recycled plastic, recovered directly from the oceans. Thanks to meticulous selection and processing, it is possible to obtain material of the highest quality, perfectly suited for the production of garden tools.

Ecolove Line

EcoLove, characterised by the use of post-consumer materials, helps reduce the amount of waste going to landfills and supports the circular economy. This line was developed with the aim of offering environmentally friendly and versatile solutions for a wide range of uses. The light grey colouring fits into any environment and style, offering an aesthetically pleasing and functional solution. The line is made from PCR (post-consumer recycled plastic).

Beelove Line

"BEE" stands for Biodiversity, Ecosystems, and Environment, and the line embodies a dedication to promoting environmentally sustainable practices, reducing the impact of plastic waste on the environment, and helping to close the life cycle of materials. With the products in the line, we make a concrete contribution to preserving biodiversity, protecting ecosystems, and promoting a healthier environment for future generations.

E-Habitat

The new range of electric pressure pumps redefines work in the garden, offering convenience and superior performance. With a lithium-ion battery providing up to 3 hours of autonomy, these pumps are designed to make every task easier and more efficient. The extendable steel lance makes it easy to reach even the most difficult areas, while the ergonomic straps ensure optimal comfort during use. With these pumps, garden maintenance becomes easier and more enjoyable.
