BLOW MOLDING + FILLING

POTENTIAL GROWTH

- Greentouch S.r.l. is a Green Chemistry project by Emmegi, initiated in 2018, aiming to establish a biorefinery for the production and trading of epoxidized soybean oil, glycerin, and surfactants using plant based raw materials.
- Its location within the Taranto port area is strategic for sourcing raw materials, marketing finished products, and establishing international recognition for the project.
- The production facilities will cover a total area of 25,000 square meters and will include, among other things, facilities for producing epoxidized soybean oil, biopolymers, and surfactants, as well as for purifying vegetable glycerin and a cogeneration plant.
- The company holds a surface right with an attached ship docking facility for a period of 50 yrs.
